I'm a Software Developer who loves learning new and modern technologies. I have some experience with FullStack development, using primarily TypeScript and JavaScript as programming languages, Vue and Angular for Frontend development and NodeJS with NestJS and MySQL for Backend.

WORK EXPERIENCE

Smart Staff • São Paulo, Brazil (remote) • 05/2021 - 12/2023

Junior Systems Developer III • Full-time

Systems Developer Assistant • Full-time

Systems Developer Intern • Internship

- Participated in the last part of the development of an input system, as well as in its maintenance later on (Angular, NestJS)
- Developed from beginning to end a check in system with photo and geolocation features (Vue 3, NestJS)
- Took part in the optimization and maintenance of a legacy system that played an important role in the internal organization of the company (Java Server Faces)
- Got involved in the development of a Business Intelligence System with Multi Tenant features (Vue 2, NestJS)

PROJECTS

Simple Call

A peer-to-peer video conference web app that uses WebRTC and was built with Nuxt and Socket.io.

- github.com/Felix-xilef/simple-call

Saver Books

Library book management system with an online reservation module. The project was developed with Vue.js and Express as the final work for my undergraduate degree.

- github.com/Felix-xilef/saver-books

EDUCATION

Specialization in Game Development

UNOPAR • 01/2024 - 06/2024

Higher Degree in System Analysis and Development

Fatec São Caetano do Sul • 01/2019 - 12/2021

SKILLS

TypeScript / JavaScript,
Python, C / C++, C#,
HTML5, CSS3, Java, Vue.js,
Nuxt, Angular, Node.js,
NestJS, SQL, Docker
